

**Embark Richmond Highway** is an initiative focused on creating a multimodal future for the Richmond Highway Corridor. This effort responds to recommendations from the [Route 1 Multimodal Alternatives Analysis](#), conducted by the Virginia Department of Rail and Public Transportation (DRPT), and intends to assess and refine the recommendations from the study by providing more detailed guidance in the Comprehensive Plan for the implementation of transit in the corridor. Embark Richmond Highway also includes coordination with the Virginia Department of Transportation (VDOT) and federal agencies to conduct Environmental Assessments (EAs). Details about the EAs can be found on the About the Study page.
